PIONEERING PLATFORM TECHNOLOGY

It all starts with SCD Probiotics’ patented [Mother Cultures](#), developed and crafted in our Kansas City headquarters. For Distributors, you purchase Products from us to distribute. For Licensees, we partner with you to send you Selected SCD Mother Cultures and through your own fermentation manufacturing, you create Products to brand and sell as made using Licensed SCD Probiotics technology.

R&D FACILITIES AT SCD PROBIOTICS

Existing State-of-the-art lab with capabilities that include:

As noted, SCD has technologies at different stages of commercialization that span multiple product segments & categories.

In the pages that follow,

We'll briefly highlight several examples of ways we partner with other companies and manufacturers across a diverse group of industries in their drive to continue creating products with improved sustainability and health benefits.

Ways we've worked with strategic partners in the past include

- ✓ Product & brand development
- ✓ R&D
- ✓ White-label & private-label manufacturing
- ✓ Probiotic "ingredient" provider for new or existing products and brands.

All natural, all purpose cleaning you can feel good about using daily. Powered by good bacteria and the beneficial compounds they produce to effectively break down dirt and grease.

- Just like probiotics work in your body, our friendly bacteria work to promote a **healthy balance** in your environment.
- **Counters, tile, glass, highchairs, door handles, toys, strollers, you name it, we clean it!**
- **Proudly Pro-Bac, Vegan, Gluten Free**
- **No Animal Testing, No Allergens, No Fake Fragrances**

DIGESTIVE HEALTH - SCD ESSENTIAL PROBIOTICS®

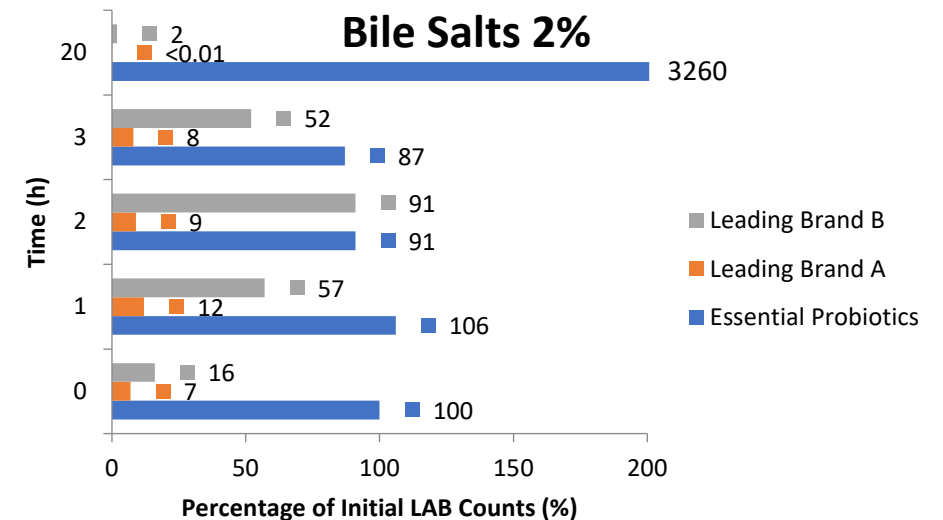

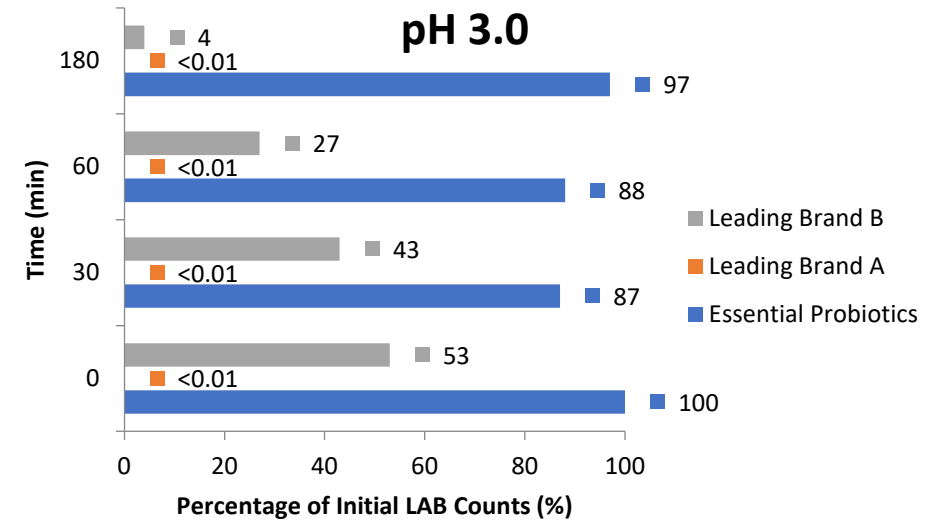

SCD Essential Probiotics – health supplement: Made with 11 live liquid probiotic strains

“Survives stomach acid 16x better than the leading brand”

In vitro studies have shown that the active microorganisms of **SCD Essential Probiotics® (EP11)** survive in simulated stomach acid levels (pH 3.0 and pH 2.0) 16 times better than the leading brand. At the third hour of trial, SCD Probiotics products survivability percentages were 97% at low pH.

Probiotics in EP11 not only survived 100% under bile salts, but also **successfully thrived at least 5 times more than initial counts**. The survivability percentages of the other two leading brands were 0% and 3.9%, respectively at the end of 20th hours.
